

Research, Design and Art-work for the Standing Up For Peace Sculpture

We Need:

- images and short text from local history about Saxon Hall and the local area especially if it relates to Peace, local people and the community.
- short text like sayings, stories, memories that can be carved onto the sculpture's surface.
- Images of drawings, quick sketches, diagrams, photos, your clay models, notes or any other art-work that can be used to inspire and inform the design of the Sculpture. Many of these will also be carved into the surface of the sculpture to inspire the hope and feeling of belonging that we know matters so much.

- Think of the things that bring you comfort through The Corvid 19 Lock-down or other experiences where friends, safety, security and companionship helped.
Or funny moments that brought people together.
Or tender moments where you felt peace all around you.

Peace is made of many factors and it can be illusive, even easy to take for granted. But we all know it and share the need for it. The images shown here are all done by local people for a Memorial Sculpture telling the story of their Community.

These do not need to be in great detail or perfect. It is the idea that matters. Between us we will come up with something much more interesting and relevant to the Community and wider world than any one of could hope to achieve on their own.

I've done this more than 20 times and the results are always wonderful!! Because the sculpture will be big we can get a lot on there. I've gotten really good at interweaving ideas to make lasting, valuable monuments for Communities to be proud of. No ones name will go on the sculpture because it will be from everyone involved in every stage, from planning and fund-raising, giving feed-back and ideas, sharing art-work, the installation work, it all adds up to something beautiful and inspiring.

Send your contributions by the end of JUNE 2020 to osprey.studios@btinternet.com and put 'Standing Up For Peace' in the subject box so that I see it.
